

DUŠAN ŽIVKOVIĆ

General Manager Joint Stock Company Elektroprivreda Srbije

Dušan Živković is an electrical engineer with decades of work experience at managerial positions, as well as in investments, financing, engineering, power systems design, control systems and their implementation at various facilities in Elektroprivreda Srbije.

He began his professional career at «Jugel Inženjering» on the construction of the National Dispatch Center. For two decades, he worked and managed investments, renewable energy sources and the development of production capacities within EPS, and then managed the Sector for Renewable Energy Sources in the distribution network. He actively participated in the preparation of long-term investment and development plans, as well as in numerous equipment revitalization projects in open-pit mines, thermal power plants, hydro power plants, transmission and distribution networks, environmental protection projects, RES development and energy efficiency. He has also dedicated part of his career to the introduction of smart metering at the distribution level, creating conditions for a significant share of RES, but also the introduction of some new technologies in the Serbian energy sector.

During his career, he has also made significant contacts with numerous international companies in the energy sector, achieving successful cooperation and exchange of experience necessary for continuous improvement and development, as well as restructuring processes of Serbian energy companies. Unequivocally supporting the Serbian economy, through the completed projects he created the conditions for their development, as well as the support for them to compete as successfully as possible in markets around the world.

With excellent knowledge of modern information technologies, in addition to English, he speaks Russian and French, and has successfully completed several different trainings in the field of management and finance, human resource management and project management.

He is married, father of two.
